

Hydro·Core is a sanitary porcelain surface system for floors and walls. The system combines high performance porcelain tile, sanitary cove moldings, with anti-microbial installation compounds to create a clean and hygienic environment. Our floor tiles exceed set industry standards for slip resistance. The patented wall to floor transition moldings make corners and wall base areas easy to clean and easy to maintain. Hydro·Core creates beautiful spaces that deliver high performance, long product life cycle, low cost, and a sanitary environment.
